Isothermal packaging is an innovative insulated packaging used for the transportation of goods at controlled temperatures. It finds extensive application in the food and pharmaceutical industries as it efficiently preserves the products from thermal and physical shocks. Most pathogens cannot survive at sub-zero temperatures.

Therefore, freezing food reduces the chances of microbes invading it. Isothermal packaging is a packaging solution for frozen food and protects the products for long periods, keeping it fit for consumption as per the convenience of the consumer.

North America and Asia-Pacific are the largest region of Isothermal Packaging, with a share about 30% separately. Sonoco, Polar Tech, Cryopak, Sofrigam and Softbox Inc.

are the top 5 manufacturers of industry, and they had about 20% combined market share.
