The global Jacquard Upholstery Fabric market size is predicted to grow from US\$ 722 million in 2025 to US\$ 916 million in 2032; it is expected to grow at a CAGR of 3.5% from 2026 to 2032.

Jacquard Upholstery Fabric is a type of fabric with intricate patterns woven directly into the material using Jacquard weaving technology. The key feature of Jacquard fabric is that the patterns are visible on both the front and back sides of the fabric, and the designs are typically more dimensional and elaborate compared to traditional fabrics. Jacquard fabrics are commonly used for high-end furniture, curtains, and decorative items, as the weaving process allows for detailed and elegant designs. These fabrics can be made from various fibers, including natural fibers like cotton and silk, and synthetic fibers like polyester.

The market for Jacquard upholstery fabric is expanding due to the growing demand for personalized and upscale decor. Advances in modern Jacquard technology have enabled fabrics to display more complex and refined patterns, offering higher color saturation and visual impact. Designers and consumers increasingly favor fabrics with unique designs and a luxurious feel, driving the widespread use of Jacquard fabric in home decor. Additionally, with rising environmental awareness, many manufacturers are adopting sustainable fibers and dyes in Jacquard fabric production to minimize environmental impact while maintaining high quality and aesthetic appeal.
