The global Japanese Penhold Table Tennis Blade market size is predicted to grow from US\$ 35.22 million in 2025 to US\$ 47.63 million in 2032; it is expected to grow at a CAGR of 2.9% from 2026 to 2032.

Japanese Penhold Table Tennis Blades are table tennis blade products based on the traditional Japanese penhold design, featuring elongated handles, relatively thicker blade structures, and typically single-sided rubber configurations to enhance forehand attacking power and stability. These blades are commonly manufactured using single-ply hinoki wood or multi-layer wooden structures. High-end products often utilize premium Japanese hinoki materials, offering excellent elasticity, crisp hitting feedback, fast ball release, and direct power transmission. Compared with traditional Chinese penhold and shakehand blades, Japanese penhold blades emphasize close-table offensive play, powerful forehand attacks, and continuous attacking styles, although their single-sided design provides relatively limited backhand coverage. These products are mainly used in professional table tennis, competitive training, advanced amateur players, sports clubs, and collectible sports equipment markets. High-end hinoki single-ply products achieve higher market value due to limited raw material availability, specialized craftsmanship, and strict manufacturing requirements. In 2025, the global Japanese penhold table tennis blade is estimated at approximately annual shipments of around 1.2 million units and a price of approximately USD30.00 per unit. The market is expected to grow at a CAGR of approximately 2.8% over the next five years. Typical single-line production capacity ranges from 0.1 million to 0.5 million units per year, while premium hinoki single-ply and professional competition-grade products generally operate at lower capacities due to stricter requirements for wood selection, craftsmanship, and quality control. Industry gross margins typically range from 40% to 55%.

United States market for Japanese Penhold Table Tennis Blade is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
