The report requires updating with new data and is sent in 48 hours after order is placed.

The global Jellies and Gummies market size is predicted to grow from US\$ 2680 million in 2025 to US\$ 3201 million in 2031; it is expected to grow at a CAGR of 3.0% from 2025 to 2031.

Jellies and Gummies are candies that have a hard sugar shell with a soft center.

There is a clear distinction between a gummy and jelly candy. Gummy candy, as the name suggests, has a gummy texture. Not quite like chewing rubber bands or calamari, but certainly more elastic than any other soft candy. Since gelatin is the only material that gives that texture, by definition, gummies are made with gelatin.

Jelly candies are solidified using carbohydrates, not proteins. So, a jelly bean center is usually made with corn starch. Other jelling ingredients are pectin, tapioca, and potato or arrowroot starch.

The major players in global Jellies and Gummies market include Haribo, MEDERER, Albanese, etc. The top 3 players occupy about 50% shares of the global market. North America and Europe are main markets, they occupy about 65% of the global market. Traditional Jellies and Gummies is the main type, with a share about 90%. Consumer Aged Under 14 is the main application, which holds a share about 50%.
