The global Josamycin API CDMO market size is predicted to grow from US\$ 139 million in 2025 to US\$ 223 million in 2032; it is expected to grow at a CAGR of 7.1% from 2026 to 2032.

Josamycin API CDMO market refers to contract development and manufacturing services dedicated to the active pharmaceutical ingredient of josamycin, a 16-membered macrolide antibiotic produced primarily through microbial fermentation followed by complex downstream purification. These CDMOs provide integrated capabilities including strain and fermentation process optimization, scale-up, impurity control, crystallization, analytical method development, regulatory documentation, and commercial GMP supply. Compared with innovative drug CDMO projects, josamycin belongs to the mature anti-infective segment, where process robustness, cost efficiency, and consistent quality are more critical than novel chemistry. Demand is mainly driven by generic drug manufacturers, regional marketing authorization holders, and veterinary pharmaceutical companies seeking compliant, low-cost, and reliable long-term API supply without maintaining their own fermentation infrastructure.

United States market for Josamycin API CDMO is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Josamycin API CDMO is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
