The use of Kegel exercise devices is increasing in popularity as more women and healthcare professionals are having open conversations about personal experiences with bladder leaks, the importance of pelvic floor health, and the prevalence of urinary problems in women. These devices are a great option for women who want to address a bladder problem or just continue to maintain a healthy pelvic floor. Kegel exercises (aka Kegeling) are one of the most important things you can do to improve reproductive and urinary health. By identifying and isolating your pelvic floor muscles, then exercising these muscles through a series of contractions, you are conditioning your pelvic floor. The improved muscle tone can mean longer time between trips to the bathroom, fewer leaks, speedier recovery from childbirth, and possibly more intense orgasms.
