Keystone Patch Panels are modular networking panels designed to house and organize multiple keystone jacks, such as Ethernet, fiber optic, HDMI, or coaxial connectors, in a structured cabling system. The supply chain of Keystone Patch Panels involves raw materials like metals, plastics, and copper/fiber components, which are processed into frames and jacks, then assembled and tested by manufacturers. Finished panels move through distributors and resellers to system integrators and end-users in data centers, offices, and homes, with aftermarket support for customization and maintenance.
