The global KF Vacuum Flange market size is predicted to grow from US$ 125 million in 2025 to US$ 190 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

In 2025, global production of KF vacuum flanges reached approximately 8.72 million units, with an estimated average selling price of US$14.6 per unit. KF vacuum flanges, also known as ISO-KF, NW, or QF quick-connect vacuum flanges, are standardized small-diameter vacuum connectors installed at interfaces of vacuum chambers, vacuum pumps, vacuum pipelines, and measuring instruments to achieve quick assembly and disassembly and airtight connection. Their typical connection structure consists of two flanges with identical sealing surfaces, a central support with an elastic O-ring, and external clamps. Installation does not require individual bolt tightening and primarily conforms to ISO 2861 and DIN standards. Standards such as 28403 are commonly used, with nominal sizes including DN10/KF10, DN16/KF16, DN25/KF25, DN40/KF40, and DN50/KF50. These are typically used for low, medium, and high vacuum pipelines with an inner diameter of less than 50 mm. Their main applications cover semiconductor etching, thin film deposition, ion implantation, and vacuum transport equipment; scientific research laboratories; mass spectrometers; electron microscopes; particle accelerators; surface analysis equipment; vacuum coating; photovoltaic and display panel equipment; vacuum furnaces; heat treatment; vacuum drying; freeze drying; pharmaceutical equipment; food packaging; leak detection equipment; and general industrial vacuum pump systems. The upstream of the industry chain mainly includes 304/304L and 316/316L stainless steel bars, pipes, and forgings; aluminum alloy bars and castings/forgings; and fluororubber, nitrile rubber, and perfluoroether rubber sealing materials. The midstream involves turning, welding, surface treatment, dimensional inspection, airtightness testing, and cleanroom packaging to produce standard or customized KF flanges. Downstream customers are primarily semiconductor equipment manufacturers, vacuum pump companies, analytical instrument manufacturers,
