A kitchen timer is a piece of equipment that tends to set for a timing range, such as a few minutes, half an hour, and even over one hour. Besides, it can beep as an alarm sound once your food is finished in a specific amount of time.

The digital timers are equipped with a clock function, but are relatively hard to program instead of a mechanical product. Besides, batteries might run out when the equipment counts down.

You can place this timer type flexibly or even mount it on the wall easily.
