A towel is a piece of absorbent fabric or paper used for drying or wiping a surface. It draws moisture through direct contact, often using a blotting or a rubbing motion. Kitchen Towel can be cloth-based or paper-based.

A paper towel is a piece of paper that can be used once as a towel and then be disposed of. A perforated roll of paper towels is normally mounted on a rod a little longer than the width of the roll, or in an alternative type of hanger that has protrusions on ears, the protrusions fitting into the ends of the paper towel roll. Paper towels can also be found packaged like facial tissues, as individual folded sheets.
