L-Calcium Lactate is a biologically fermented organic calcium with the characteristics of high solubility, easy absorption, little gastrointestinal irritation, and high safety. Compared with most calcium supplements, L-calcium lactate has better solubility in water and can supply calcium ions in the intestines in a timely manner to meet the body's need for calcium. Its pH value is neutral and does not consume gastric acid, so it will not cause indigestion, constipation and other symptoms after consumption.

The global L-Calcium Lactate market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
