Laboratory Mouse Housing Cage is a specialized containment unit designed for the care, housing, and observation of laboratory mice used in scientific research. These cages are engineered to meet the physiological and behavioral needs of mice while ensuring a controlled and hygienic research environment. Typically made from transparent, durable materials like polycarbonate or polysulfone, they often include features such as bedding, food and water containers, ventilation, and compatibility with Individually Ventilated Cage (IVC) systems. The design supports animal welfare, minimizes stress, and facilitates accurate scientific data collection.

The global market for laboratory mouse housing cages is steadily expanding, driven by the growing use of mice in biomedical research, particularly in genetics, cancer, neuroscience, and infectious disease studies. North America and Europe are the leading markets, supported by established research infrastructure and funding. Meanwhile, the Asia-Pacific region is experiencing rapid growth due to increasing investment in pharmaceutical and biotech R&D. Market trends include the adoption of modular cage systems, enhanced environmental control technologies, and smart monitoring features. Leading manufacturers in this space include Tecniplast, Allentown, Lab Products, Inc., and Suzhou Fengshi.
