Large format camera is a type of camera. It is typically used for photographic applications that require extremely high image quality, such as landscape photography, architectural photography, and fine art photography. Large format cameras use large format film or digital backs and are capable of capturing a far greater range of detail and color than regular small format cameras. This type of camera offers extremely high resolution and a wide angle of view, allowing photographers to create work with depth and layers. However, large format cameras are usually heavier, larger and more complex to operate than small format cameras, requiring more skill and experience to master. As a result, it is not the type of camera that every photographer uses or is able to use.
