Laser cutting is a technology that uses a laser to cut materials. Laser cutting works by directing the output of a high-power laser most commonly through optics. The laser optics and CNC (computer numerical control) are used to direct the material or the laser beam generated. The laser cutting machines initially casts laser beam on the surface of work piece, melts it and finally evaporates the particular area of work piece using the energy released by laser.

Global laser cutting machines key players include Trumpf, Mazak, Bystronic, Amada, Han'S Laser, etc. Global top 5 manufacturers hold a share over 40%.

Europe is the largest market, with a share over 32%, followed by China, have a share about 25 percent. In terms of product type, Fiber Laser Cutting Machine occupies the largest share of the total market, over 50%. And in terms of application, the largest application is Automotive, followed by Machine Industry.
