Laser Dazzler is a kind of directed energy weapon, mainly by emitting high-power laser beams to temporarily disable the visual system of the target. This kind of equipment is usually used in military and security fields to interfere with or prevent the actions of targets in a non-lethal way. Its working principle is to use the strong light of the laser to temporarily blind or interfere with the visual system of the target, thereby achieving the purpose of rejection. For instance, some laser rejectors can emit green or infrared lasers, causing a temporary disabling effect on human vision or optical sensors, but without causing long-term harm.
