According to our LPI (LP Information) latest study, the global Laser Direct Imaging System (LDI) market size was valued at US\$ 795.1 million in 2023. With growing demand in downstream market, the Laser Direct Imaging System (LDI) is forecast to a readjusted size of US\$ 1028.5 million by 2030 with a CAGR of 3.7% during review period.

The research report highlights the growth potential of the global Laser Direct Imaging System (LDI) market. Laser Direct Imaging System (LDI) are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Laser Direct Imaging System (LDI). Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Laser Direct Imaging System (LDI) market.

The Laser Direct Imaging (LDI) Equipment offers auto focus capabilities so that the system can handle different thicknesses of material and rapid job change-overs without expensive tooling.

Using LDI to create the circuit traces gives the PCB manufacturers a lot of advantages, most of them pertaining to weaknesses of using a Photo-tool. Eliminating the need of a Photo-tool removes alignment issues, light refraction issues, and those imperfections related to environmental variations.

Also, with LDI, PCB factories can achieve the development of images that require more precision, and resolution, due to the computer's enhanced optical alignment, that automatically compensates distortion on the materials.

Changes to the required images, are also easier to achieve with LDI: with the traditional approach, the smallest mistake on the Photo-tool, required the factory to produce a new one, wasting time and money; however, with LDI, these changes became a matter of updating the design file, which can be done more consistently and cost-effectively.

The major players in global laser direct imaging (LDI) equipment market include Orbotech, YS Photech, CFMEE, etc. The top 5 players occupy about 70% shares of the global market. China is main market, which occupies about 50% of the global market. Polygon mirror 365nm is the main type, with a share about 60%. HDI and Standard PCB is the main application.
