The global Laser Glass Cutting and Splitting Machines market size is predicted to grow from US$ 163 million in 2025 to US$ 219 million in 2032; it is expected to grow at a CAGR of 4.4% from 2026 to 2032.

Laser Glass Cutting and Splitting Machine is an automated device that integrates laser cutting and laser cleaving processes for efficient and high-precision glass processing. It utilizes a picosecond laser to cut the glass internally, and then uses a CO? laser on the same machine to heat and cleave the cutting line, achieving a one-step cutting and separation process to obtain a product with smooth edges and no chipping.The upstream industry mainly includes the supply of core components and raw materials. Core components include ultrashort pulse lasers (picosecond and femtosecond lasers), precision optical components, and high-precision motion control systems. Their prices range from tens of thousands to hundreds of thousands of US dollars, with industry gross profit margins typically between 20% and 40%.

United States market for Laser Glass Cutting and Splitting Machines is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Laser Glass Cutting and Splitting Machines is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
