Laser wall splicing is a device that uses laser light sources and DLP technology to splice multiple projector cores into a large-size, high-brightness, high-definition display screen. Laser wall mosaic has the advantages of high color reproduction, low power consumption, long life, and good stability. It is widely used in conference display, command and dispatch, theme venues, virtual simulation and other fields. One of the major manufacturers of laser wall-mounting is Guangfeng Technology, which has launched a new ultra-thin laser wall-mounting unit, which uses ALPD laser display technology and complies with the Rec.709 international color gamut standard, improving the picture display quality. Laser wall joining is different from laser welding, which is a process that automatically joins and welds metal plates of different materials.
