The global Laser Welding Machine Rental Service market size is predicted to grow from US$ 1007 million in 2025 to US$ 1602 million in 2032; it is expected to grow at a CAGR of 7.0% from 2026 to 2032.

Laser welding machine leasing service refers to a business model in which equipment suppliers provide users with laser welding equipment (such as fiber/semiconductor/disk laser welding machines) with high energy density, narrow heat-affected zone and non-contact processing characteristics through short-term or long-term contracts, and provide technical support, maintenance and process training. Its core value lies in reducing users' one-time capital investment (equipment costs can be reduced by 60%-80%), and matching production fluctuations (such as temporary capacity expansion during order peak periods) through flexible lease periods (daily/monthly/project-based). It is especially suitable for industries such as automotive manufacturing, 3C electronics, and medical devices that have strict requirements on equipment accuracy (welding penetration error ? 0.1mm) and stability (MTBF ? 5000 hours) but are sensitive to investment return cycles.

United States market for Laser Welding Machine Rental Service is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
