A lathe sleeve, also known as a lathe chuck sleeve or lathe chuck adapter, is a cylindrical metal component that is used to connect a lathe chuck to the lathe spindle. It is designed to fit securely onto the lathe spindle and provide a mounting surface for the lathe chuck. The lathe sleeve typically has a threaded end that allows it to be screwed onto the lathe spindle, and a tapered end that fits into the bore of the lathe chuck. This allows for quick and easy installation and removal of the lathe chuck from the lathe spindle.
