The report requires updating with new data and is sent in 48 hours after order is placed.

In supply chain management last-mile describes a similar problem for transporting either people or freight. In freight networks, parcels can be delivered to a central hub efficiently via ship, train or other means, but they must then be loaded into smaller vehicles for delivery to individual customers. In transportation networks, 'last mile' describes the rising marginal cost of getting people from a transportation hub such as an airport or train station to their final destination.
