Lead pliers resemble pliers, but the tip shape is characterized by a thin plate. They are well-suited for gripping thin wires in tight spaces and bending sheet metal. The gripping portion is also plate-shaped, reducing the likelihood of damaging the object being held. The sturdy and broad tip provides a strong grip, contributing to stable work and precise processing. On the other hand, they do not have the cutting ability of ordinary pliers or radio pliers. Lead pliers are designed for very detailed work and feature a lineup of different tip shapes and sizes.
