In 2024, the global production of lead-screw linear stepper motors will reach 574k units, with an average selling price of US$300 per unit.A lead screw linear stepper motor is a linear motion actuator that integrates a stepper motor and a lead screw transmission mechanism. The stepper motor's step-by-step drive drives the lead screw, which then converts the rotational motion into high-precision linear motion using a lead screw and nut assembly. It offers high positioning accuracy, fast response, compact structure, and ease of control. Compared to traditional motor and lead screw split-type structures, it offers a high degree of integration, easy installation, and stable operation, making it suitable for space-constrained applications.
