A leak detection band is a band-shaped sensor. It is used in leak detectors or liquid leak detectors as a safety device to detect leaks or leaking liquid. When leaked water or liquid comes into contact with the sensor strip, the electrical resistance of the strip changes.

After detection, the sensor can be used again by completely wiping off the leaked water/liquid, thus offering excellent durability. There are two types of leak detection strips: those installed on the floor and those installed around pipes.

The global Leak Detection Band market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
