LED characters and numbers usually refer to a display technology that uses LEDs (light-emitting diodes) as display elements to present characters and numbers by controlling the on and off states of LEDs. LED characters and numbers are widely used in various digital display devices, such as LED screens, LED digital tubes, LED modules, etc. LED characters are usually composed of a group of LED lamp beads, arranged in a specific shape to display letters, numbers, symbols and other information. LED characters can use LED lamp beads of different colors, such as red, green, blue, etc., to achieve various display effects. LED characters can present different characters and numbers by controlling the brightness and on-off status of each LED lamp bead. LED numbers are usually a specific shape of LED characters for displaying digital information. LED numbers are usually composed of 7-segment or 14-segment LED lamp beads, arranged in the shape of numbers, and can display numbers from 0 to 9. LED digits are usually used in applications such as timers, counters, clocks, electronic scales, etc., and are widely used because of their advantages such as high brightness, low power consumption, and long life. LED numbers can also use LED lamp beads of different colors to achieve a variety of display effects.

United States market for LED Character and Number is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
