The global LED Flashlight market size is predicted to grow from US\$ 930 million in 2025 to US\$ 1259 million in 2031; it is expected to grow at a CAGR of 5.2% from 2025 to 2031.

An LED flashlight is a portable lighting device that uses Light Emitting Diodes (LEDs) as the light source. LED flashlights have become increasingly popular due to their energy efficiency, durability, compact size, and long battery life compared to traditional incandescent flashlights. The source of the light often used to be an incandescent light bulb (lamp) but has been gradually replaced by light-emitting diodes (LEDs) since the mid-2000s. A typical flashlight consists of the light source mounted in a reflector, a transparent cover (sometimes combined with a lens) to protect the light source and reflector, a battery, and a switch.

Global key players of LED Flashlight include Olight, Ledlenser, Maglite, Energizer, Pelican, etc. The top five players hold a share over 44%. Asia-Pacific is the largest market, and has a share about 71%, followed by Europe with share 10%. In terms of product type, Rechargeable Flashlight is the largest segment, occupied for a share of 87%. In terms of application, Industrial has a share about 41 percent.
