LED panel indicator light is generally a kind of LED indicator light used on the control panel of equipment or facilities to display the status of equipment, operating status, warning information, etc. LED panel indicators usually use LED lamp beads as the light source, and use different colors of LED lamp beads (such as red, green, yellow, blue, etc.) and different flashing frequencies and brightness to indicate different states or information. The LED panel indicator light is usually composed of a control circuit, LED lamp beads, housing, etc., and the on and off, color, etc. of the LED lamp beads are controlled by the control circuit. LED panel indicators are widely used in various equipment, instruments, control panels, control boxes, cabinets, etc., such as electronic equipment, electrical equipment, communication equipment, industrial automation equipment, automotive dashboards, elevator control panels, etc. Through the state changes of the LED panel indicators, users can intuitively understand the operation status, working status, warning information, etc. of the equipment, so as to facilitate operation and monitoring. LED panel indicators play an important role in equipment control and monitoring, providing convenient visual feedback and status indication.
