LED rotating beacon is a lighting device used to provide visual warning signals in various applications, including aviation, maritime, and industrial uses. The beacon consists of an array of high-intensity LEDs arranged in a circular or semi-circular pattern inside a housing that rotates at a constant speed. The rotating motion creates a distinctive flash pattern, enhancing visibility and alerting people to potential hazards or indicating the presence of a specific location. LED rotating beacons are known for their energy efficiency, long lifespan, and reliability. They are often used on aircraft, buildings, vehicles, and other installations where a highly visible signal is required.
