According to our LPI (LP Information) latest study, the global LED Thermal Products market size was valued at US\$ 2218.7 million in 2023. With growing demand in downstream market, the LED Thermal Products is forecast to a readjusted size of US\$ 4789 million by 2030 with a CAGR of 11.6% during review period.

The research report highlights the growth potential of the global LED Thermal Products market. LED Thermal Products are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of LED Thermal Products. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the LED Thermal Products market.

Most of the electricity in an LED becomes heat rather than light (about 70% heat and 30% light). If this heat is not removed, the LEDs run at high temperatures, which not only lowers their efficiency, but also makes the LED less reliable. Therefore, LED Thermal Products are used to remove or decrease the heat that created by LED.

Global LED Thermal Products key players include Sunonwealth, Aavid Thermalloy, Cree Inc., SiTime(Mega), etc.

China is the largest market, with a share nearly 30%, followed by Europe and North America, both have a share over 45 percent.

In terms of product, Heat Sink covered over 35 % of the market share, and is projected to dominate the market. And based on of application, the largest application is Residential, followed by Office, etc.
