The global LED Torch Light market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

LED torch light is a kind of lamp made of LED light-emitting principle, usually used for outdoor lighting or decoration. The appearance of the LED torch light is similar to that of a traditional torch, but it uses LED beads instead of flames, making it safer, more energy-saving and environmentally friendly. The color of the LED torch light can be monochromatic or colorful, and can even achieve color-changing and flashing effects. The advantages of LED torch lights are as follows: LED torch lights have a long life, which can generally reach more than 50,000 hours, far exceeding the life of incandescent lamps and energy-saving lamps. LED torch lights have low energy consumption. The energy consumption of white LEDs is only 1/10 of incandescent lamps and 1/42 of energy-saving lamps, which can save a lot of electricity bills and resources. The LED torch light has good light quality, no ultraviolet and infrared radiation, no stroboscopic and mercury and other harmful substances, and does no harm to the human body and the environment. The design of the LED torch light is flexible, and the brightness, color and mode can be adjusted according to different occasions and needs to create different atmospheres and effects.

United States market for LED Torch Light is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for LED Torch Light is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
