The report requires updating with new data and is sent in 48 hours after order is placed.

An ice pop is a liquid-based frozen snack on a stick. Unlike ice cream or sorbet, which are whipped while freezing to prevent ice crystal formation, an ice pop is 'quiescently' frozen—frozen while at rest—and becomes a solid block of ice. We cover Popsicles (with stick) and freezer pops (tube filled with liquid).

The main manufacturers of Global Ice Pops include Nestle, Unilever, Yili, etc. These top three manufacturers hold a market share about 52%. Europe is the main production region in the world.
