The global LF End Glow Fiber market size is predicted to grow from US\$ 86.73 million in 2025 to US\$ 144 million in 2032; it is expected to grow at a CAGR of 7.7% from 2026 to 2032.

In 2025, global LF end glow fiber production reached 806 million meters, with an estimated average selling price of US\$0.11 per meter. LF end glow fiber refers to illumination-grade plastic optical fiber products that use PMMA, modified PMMA, or other transparent polymers as the core material, fluoropolymers or transparent sheath materials as the cladding/coating, and primarily output light through the fiber end face. The core function of LF-terminal optical fiber is to conduct light from LED, halogen, or laser/optical engine sources along the fiber core and form point, star, or end-face clustered lighting effects at the fiber ends. It features flexibility, cutability, low voltage safety, photoelectric separation, moisture resistance, easy installation, and strong decorative properties. It is mainly used in starry sky ceilings, automotive starry sky ceilings and interior ambient lighting, hotel/club/cinema decoration, museum display case lighting, jewelry and commercial displays, swimming pool water features, fountains, saunas, architectural outline lighting, fiber optic chandeliers, and art installations. The upstream mainly includes MMA monomers, PMMA optical-grade resin, fluoropolymer cladding materials, PVC/PE/LSZH sheathing materials, masterbatches, UV-resistant additives, extrusion equipment, fiber drawing equipment, precision molds, testing instruments, and LED light sources; the midstream consists of manufacturers of bare PMMA fiber, sheathed fiber, fiber bundles, fiber optic lighting cables, and customized components; the downstream includes automotive interior manufacturers, the aftermarket, architectural lighting contractors, commercial space design companies, stage lighting companies, fiber optic lighting fixtures, home improvement DIY channels, and industrial sensing customers. Gross profit margin is approximately 25%-40%.
