Ligating clips for laparoscopic multi-fire vascular tissue closure are specialized surgical devices used for ligation of blood vessels or tissues during minimally invasive surgeries, including laparoscopic procedures. These clips provide secure closure by clamping blood vessels or tissues, ensuring effective hemostasis. The multi-fire clip applicator is the delivery instrument for the ligating clips, allowing for multiple clip applications in succession without the need for reloading. This tool enhances surgical efficiency, reduces procedure time, and minimizes the invasiveness of surgeries, contributing to faster patient recovery.
