The global Light Bus market size is predicted to grow from US\$ 31750 million in 2025 to US\$ 39420 million in 2031; it is expected to grow at a CAGR of 3.7% from 2025 to 2031.

With the acceleration of urbanization and the growth of public transportation demand, the market demand for small buses as a flexible and efficient means of transportation is expected to increase. Especially in narrow city streets and busy traffic environments, small buses can better adapt and meet travel needs. The increase in environmental awareness has a positive impact on the development of small buses. Compared with large buses, small buses usually have lower energy consumption and emissions and meet environmental protection requirements. With the promotion of clean energy and low-carbon transportation methods, environmentally friendly small buses are expected to gain a broader market space.
