Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Light Field market.

The light field is a vector function that describes the amount of light flowing in every direction through every point in space. The space of all possible light rays is given by the five-dimensional plenoptic function, and the magnitude of each ray is given by the radiance. Michael Faraday was the first to propose (in an 1846 lecture entitled 'Thoughts on Ray Vibrations') that light should be interpreted as a field, much like the magnetic fields on which he had been working for several years. The phrase light field was coined by Andrey Gershun in a classic paper on the radiometric properties of light in three-dimensional space (1936).

North America is the largest Light Field market with about 64% market share. Europe is follower, accounting for about 18% market share. The key manufacturers are Lytro,

Avegant, FoVI 3D, Japan Display Inc (JDI), OTOY, Light Field Lab, Holografika, Lumii, Raytrix, Leia, NVIDIA, Toshiba, Ricoh Innovations etc. Top 3 companies occupied about 26% market share.
