The global Light Oil Separator market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Light oil separator is a kind of equipment that can achieve the light oil content meeting the national emission standards after the oil wastewater is treated. It is mainly used to treat wastewater with light oil liquids (such as diesel, gasoline, hot oil, etc.) with a specific gravity lower than 0.95g/m³, insoluble or slightly soluble in water, and not easy to saponify. It uses the characteristic that the specific gravity of light oil is less than that of water to separate light oil from water by gravity separation or centrifugal separation. It is widely used in gas stations and machine repair workshops, food processing, ports and other fields.

United States market for Light Oil Separator is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
