## Abstracts

The global Lipochroman-6 market size is predicted to grow from US\$ 355 million in 2025 to US\$ 513 million in 2031; it is expected to grow at a CAGR of 6.3% from 2025 to 2031.

Lipochroman-6 is a 'bio-inspired molecule' that is engineered to be similar to gamma-tocopherol. This results in a powerful antioxidant that results in protection from Radical Oxygen, Nitrogen, and Carbonal Species. Studies have shown DMC to have higher antioxidative power than many well-known antioxidants, like Vitamin C, Vitamin E, CoQ 10, Green Tea Extract, etc. In skincare, studies have shown it to have benefits on: wrinkle depth, skin elasticity, dark spots, and hyperpigmentation, and lipid peroxidation. One drawback is that it can only be used in low concentrations because of its solubility and texture.
