The global Liquefied Natural Gas (LNG) Valves market size is predicted to grow from US\$ 1537 million in 2025 to US\$ 2374 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

LNG (Liquefied Natural Gas) is a clear, colourless liquid created when natural gas is cooled to -162°C . In liquid form. LNG Valves like Ball valves, gate valves, check valves, globe valves, and butterfly valves, made of titanium, nickel aluminum bronze, and duplex stainless steel, are recommended for pipeline transportation of liquefied natural gas.

Over one hundred billion cubic metres of new LNG supply capacity is to be commissioned between 2018 and 2023, with the bulk of these additions coming from Australia and the United States. So far, this wave of new liquefaction capacity has been absorbed without any signs of looming oversupply, mostly by Asian importers. Both mature and fast-growing emerging markets strongly have contributed to this growth.
