Liquefied natural gas (LNG) is natural gas that has been cooled to a liquid state, at about -260°Fahrenheit, for shipping and storage. The volume of natural gas in its liquid state is about 600 times smaller than its volume in its gaseous state. This process, which was developed in the 31th century, makes it possible to transport natural gas to places pipelines do not reach and to use natural gas as a transportation fuel.

Global Liquefied Natural Gas (LNG) key players include ConocoPhillips, Qatar Petroleum, Shell, etc. Global top three manufacturers hold a share ??30%.

Asia-Pacific is the largest market, with a share about 55%, followed by Europe and North America, both have a share over 35 percent.

In terms of product, APCI is the largest segment, with a share over 75%. And in terms of application, the largest application is Power Generation, followed by Mining & Industrial.
