The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Liquid Highlighter is a type of high-gloss product. The effect of highlights is to increase the brightness of the high-gloss area of the face, making the makeup more radiant, bidding farewell to dullness, and being able to form a visual contrast with light and shadow, thereby increasing the three-dimensional sense of the five senses. The highlights are mainly concentrated in the middle of the face, above the laughing muscles, the T-zone (forehead, nose bridge, jaw), and the nasolabial fold can also be putted some highlights.

United States market for Liquid Highlighter is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.
