These containers are usually made of sturdy materials such as high-density polyethylene (HDPE) or metal, with an external frame for additional protection and stability. Compared to regular IBCs, Liquid IBCs are usually made of materials that are more corrosion-resistant and chemical-resistant, ensuring that liquids do not react or leak when stored. The shape design focuses on the flow and stackability of liquids. The liquid IBCs offer space and transport cost savings over rigid IBCs and are built to last for many years.
