The global Liquid Nitrogen Atmospheric Pressure Storage Tank market size is predicted to grow from US\$ 192 million in 2025 to US\$ 246 million in 2032; it is expected to grow at a CAGR of 3.7% from 2026 to 2032.

The upstream of the liquid nitrogen atmospheric pressure storage tank industry chain mainly includes suppliers of key raw materials and components such as high-strength cryogenic steel, aluminum alloys, insulation materials (such as multi-layer vacuum insulation panels and polyurethane foam), valves, and pressure control components. The midstream consists of companies involved in the design, manufacturing, and assembly of liquid nitrogen atmospheric pressure storage tanks, encompassing cryogenic vessel structural design, inner and outer shell manufacturing, vacuum or multi-layer insulation technology application, integration of cryogenic valves and safety devices, and configuration of pressure monitoring and temperature control systems. Downstream applications are concentrated in liquid nitrogen storage and transportation, cryogenic refrigeration in laboratories and research institutions, cold chain logistics for pharmaceuticals and biological products, industrial gas supply, and semiconductor cryogenic processes. These applications are driven by purchases and use by various research institutions, pharmaceutical companies, industrial gas companies, and cold chain logistics enterprises, forming a complete industry chain.

In 2025, the average price of a liquid nitrogen atmospheric pressure storage tank is projected to be US\$6,700, with sales reaching 29,254 units.

Liquid nitrogen atmospheric pressure storage tanks are containers specially designed to store liquid nitrogen. They are usually made of high-strength materials to withstand the extremely low temperature and pressure of liquid nitrogen. These tanks can maintain

the state of liquid nitrogen at room temperature and are widely used in scientific research, industry, and medical fields, providing important guarantees for the safe storage and use of liquid nitrogen.
