The global Liquid Potassium Thiosulfate market size is predicted to grow from US\$ 388 million in 2025 to US\$ 484 million in 2031; it is expected to grow at a CAGR of 3.7% from 2025 to 2031.

Liquid Potassium Thiosulfate (KTS) is a specialized fertilizer product with a nutrient composition of 25% potassium oxide (K₂O) and 17% sulfur. Commonly referred to as 0-0-25-17s in the agricultural industry, this liquid fertilizer provides essential potassium and sulfur to support plant growth. Potassium is critical for various plant functions, including root development, water regulation, and overall plant vigor, while sulfur enhances protein synthesis and chlorophyll production. The liquid form of KTS offers ease of application, allowing for integration with other fertilizers and compatibility with methods like fertigation and foliar spraying, making it a versatile and efficient choice for nutrient management in agriculture.

Market Concentration and Key Players

The global market for Liquid Potassium Thiosulfate is highly concentrated, with several major players dominating the industry. Key manufacturers include Tessenderlo Group, Mears Fertilizer, Hydrite Chemical, and Plant Food. These companies are recognized for their significant production capabilities and distribution networks, ensuring the widespread availability of Liquid KTS. Tessenderlo Group, in particular, stands out as a leading player, known for its extensive portfolio of liquid fertilizers and strong market presence. The concentration of market activity among these key players underscores the competitive nature of the industry and the importance of maintaining high product

quality and reliable supply.

Market Trends and Applications

Liquid Potassium Thiosulfate is predominantly used in the cultivation of economic crops, which represent approximately 65% of its total market application. These crops include high-value agricultural products such as fruits, vegetables, and grains, where effective nutrient management is crucial for optimizing yield and quality. The growing emphasis on precision agriculture and sustainable farming practices is driving the demand for Liquid KTS, as it provides a targeted solution for nutrient supplementation. Additionally, Liquid KTS is used in ornamental plant cultivation and turf management, contributing to healthy growth and visual appeal. The market is expanding due to the increased adoption of advanced agricultural techniques and the need for efficient fertilization solutions. Key regions driving this growth include Asia-Pacific and North America, where significant agricultural activities and high demand for effective fertilizers are prominent. As agricultural practices evolve and focus on sustainability, the demand for Liquid Potassium Thiosulfate is expected to rise, reflecting its essential role in modern farming.
