Liquid UV-curable adhesive is a type of adhesive that cures when exposed to ultraviolet (UV) light. It is typically a clear liquid that is applied to the surfaces to be bonded, and then exposed to UV light to create a strong bond. This type of adhesive is often used in industries such as electronics, medical devices, and automotive, where rapid curing time and high bond strength are required. It offers several advantages over traditional adhesives, such as faster curing times, improved bond strength, and the ability to bond a wide range of materials.
