The global Lithium Battery for Two Wheelers market size is predicted to grow from US\$ 3341 million in 2025 to US\$ 8919 million in 2032; it is expected to grow at a CAGR of 15.4% from 2026 to 2032.

The lithium battery for two-wheeled vehicles, such as electric bicycles (e-bikes), electric scooters (e-scooters), and electric motorcycles, is the primary power source that drives the electric motor of these vehicles. Lithium-ion (Li-ion) and lithium iron phosphate (LiFePO₄) are the most common types of batteries used, providing a combination of high energy density, lightweight design, and long lifespan. These batteries are critical for optimizing the performance, range, and efficiency of two-wheeled electric vehicles. In 2024 the production was 18.22million kWh with an average price of US\$163.

As global environmental awareness increases and governments support electric mobility, the electric two-wheeler market is experiencing unprecedented growth. Compared to traditional lead-acid batteries, lithium batteries are gradually becoming the mainstream power choice for electric bicycles and motorcycles due to their significant advantages such as high energy density, lightweight design, long lifespan, and fast charging.
