The global Lithium Battery Charging and Discharging Protection Board market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

The original intention of the design of the lithium battery protection board is to ensure the safety of lithium batteries and ensure that lithium-ion batteries will not be overcharged or over-discharged. Since overcharging and over-discharging of lithium-ion batteries in the past can cause battery damage or explosions, fires and other dangers, protection boards also appeared when lithium-ion batteries were introduced. Recently, with the emergence of lithium iron phosphate lithium-ion batteries, it is said that lithium iron phosphate lithium-ion batteries are not afraid of overcharging and over-discharging, so there is a saying that they can be used without protection boards. However, so far, no battery manufacturer has publicly announced that it will not use protection circuits. The purpose of the protection board is the bodyguard, and the protection board is to ensure the safety of lithium-ion batteries.

United States market for Lithium Battery Charging and Discharging Protection Board is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Lithium Battery Charging and Discharging Protection Board is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
