Lithium grease, also known as lithium soap and white lithium, is a soap that is a lithium derivative. These soaps are primarily used as components of various lubricant greases. Majority of the lubricating greases are made of an oil and a soap. Grease is made by dispersing soap into the oil to form a stable, viscous gel-like substrate called grease. Lithium soap based grease adheres specifically well to metal. It is non-corrosive. It is for suitable for uses under heavy load applications such as industrial machinery. These greases also exhibit good temperature tolerance. They possess drip temperature of 190°C to 220°C. Lithium grease also resists moisture. Thus, it is a preferred choice of grease for household products such as electric garage doors. It can also be used in automotive applications such as CV joints. These greases can be modified by different additives such as PTFE and molybdenum disulfide for better performance under high loads and higher temperature resistance.
