According to our LPI (LP Information) latest study, the global Lithium-ion Capacitor market size was valued at US\$ 21 million in 2023. With growing demand in downstream market, the Lithium-ion Capacitor is forecast to a readjusted size of US\$ 29 million by 2030 with a CAGR of 5.0% during review period.

The research report highlights the growth potential of the global Lithium-ion Capacitor market. Lithium-ion Capacitor are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Lithium-ion Capacitor. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Lithium-ion Capacitor market.

A lithium ion capacitor (LIC) is a capacitor that uses a carbon-based material capable of absorbing lithium ions as the negative electrode material, and improves energy density by adding lithium ions to it, while using the principles of a general electric double layer capacitor.

The principle of charging and discharging differs between the positive electrode and the negative electrode, and the structure combines the negative electrode of a lithium-ion battery and the positive electrode of an electric double layer.

A type of asymmetric capacitor with a different positive and negative electrode principle, which combines the positive electrode of an electric double-layer capacitor and the

negative electrode of a lithium-ion battery. While the positive electrode operates by the principal of physical, Electrical Double Layer, the negative electrode charges and discharges by the redox reaction of lithium. The high energy density compared to conventional capacitors is largely due to the fact that the pseudo electrostatic capacitance of the negative electrode is increased by pre-doping.

JM Energy is the leading manufacturer in the global Lithium-ion Capacitor market with the market share of about 71%, in terms of revenue, followed by Taiyo Yuden and VINATech. Besides the big vendors, there are also several medium and small vendors, including Cap Energy, Jianghai, EVE Energy, and TIG.
