A lithium-ion electric counterbalanced forklift refers to an electric forklift that uses a lithium-ion battery as its power source. It primarily consists of a power unit, chassis, working equipment, and electrical appliances. The forklift is equipped with lifting forks at the front and a counterweight at the rear. It operates by using the lithium-ion battery to drive the motor, which powers the movement of the forklift and the lifting and lowering of the forks. It maintains balance and stability during the lifting and transportation of loads through the vehicle's weight and the counterweight at the rear, enabling the transfer of goods. This type of forklift has extensive applications in the logistics and warehousing industry.
