The global Lithium Supplement market size is predicted to grow from US$ 113 million in 2025 to US$ 716 million in 2032; it is expected to grow at a CAGR of 31.1% from 2026 to 2032.

Lithium supplement can optimize the initial coulombic efficiency and cycle life of batteries. During the formation of the solid electrolyte interphase (SEI) layer on the anode surface, a certain amount of active lithium from the cathode is irreversibly consumed, leading to low first-cycle efficiency and poor cycle life. Lithium supplements effectively pre-lithiate the electrode materials, compensating for lithium loss during the first cycle to improve both initial efficiency and lifespan. This technology will promote the industrialization of silicon-carbon anodes, further enhancing battery energy density and extending cycle life. During the formation process of lithium-ion batteries, the growth of the SEI layer on the anode surface consumes active lithium, resulting in energy loss. Currently, the irreversible capacity loss of widely used graphite anodes exceeds 6%, while silicon-based anodes experience irreversible capacity losses as high as 10% to over 20%, limiting the full advantage of the high specific capacity of silicon-carbon systems. Lithium supplement technology compensates for this active lithium loss, addressing the low first-cycle efficiency drawback of silicon-carbon anodes and fully leveraging their high capacity benefits. In 2025, global Lithium Supplement sales reached approximately 1,920 tons, with an average price of 60 US$/Kg.

Currently, lithium supplementation methods are divided into two types: anode lithium supplementation and cathode lithium supplementation. Anode lithium supplementation includes approaches such as lithium foil supplementation, lithium powder supplementation, lithiated silicon powder supplementation, and electrolyte lithium salt aqueous solution supplementation. However, anode lithium supplementation still faces significant challenges related to battery manufacturing processes: incompatibility of metallic lithium with production environments, conventional solvents, binders, and heat

treatment procedures make the path for anode lithium supplementation difficult and full of obstacles. As an alternative technical route, many lithium supplementation additives targeting cathode materials have entered the research scope. Compared to the complex and high-investment anode supplementation, cathode lithium supplementation is much simpler: typically, a small amount of high-capacity material is added during the cathode slurry mixing process; during charging, Li? ions are released from the high-capacity material to compensate for the irreversible capacity loss during the first charge-discharge cycle. Cathode lithium supplementation has the greatest industrial application potential due to its high safety and the fact that it does not require changes to existing battery manufacturing processes. Currently, the main materials used as cathode lithium supplementation additives include lithium-rich compounds, conversion reaction-based nanocomposites, and binary lithium compounds.

LP Information, Inc. (LPI) ' newest research report, the ?Lithium Supplement Industry Forecast? looks at past sales and reviews total world Lithium Supplement sales in 2025, providing a comprehensive analysis by region and market sector of projected Lithium Supplement sales for 2026 through 2032. With Lithium Supplement sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Lithium Supplement industry.

This Insight Report provides a comprehensive analysis of the global Lithium Supplement landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Lithium Supplement portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms? unique position in an accelerating global Lithium Supplement market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Lithium Supplement and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Lithium Supplement.

This report presents a comprehensive overview, market shares, and growth opportunities of Lithium Supplement market by product type, application, key manufacturers and key regions and countries.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Lithium Supplement market?

What factors are driving Lithium Supplement market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Lithium Supplement market opportunities vary by end market size?

How does Lithium Supplement break out by Type, by Application?

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Lithium Supplement Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Lithium Supplement by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Lithium Supplement by Country/Region, 2021, 2025 & 2032
2.2 Lithium Supplement Segment by Type
  2.2.1 Li5FeO4 (LFO)
  2.2.2 Li2NiO2 (LNO)
  2.2.3 Others
  2.2.4 Lithium Supplement Sales by Type
    2.2.4.1 Global Lithium Supplement Sales Market Share by Type (2021-2026)
    2.2.4.2 Global Lithium Supplement Revenue and Market Share by Type (2021-2026)
    2.2.4.3 Global Lithium Supplement Sale Price by Type (2021-2026)
2.3 Lithium Supplement Segment by Method
  2.3.1 Cathode Lithium Supplementation
  2.3.2 Anode Lithium Supplementation
  2.3.3 Lithium Supplement Sales by Method
    2.3.3.1 Global Lithium Supplement Sales Market Share by Method (2021-2026)
    2.3.3.2 Global Lithium Supplement Revenue and Market Share by Method (2021-2026)
